

Records

A permanent health record is on file in the nurse's office for each child. Information is obtained from health history forms, kindergarten physicals, transferred from health records, or direct from the parents. Vision and hearing results, injuries, childhood diseases, etc., are also recorded on the health record cards.

Please report to the nurse any updated immunizations or health related problems that occur throughout the year.

Each fall report the past year's incidents to the nurse's office to keep the health record up-to-date. Conditions to be reported include:

1. Communicable diseases
2. Fractures or other serious injuries
3. Immunizations, boosters
4. Serious illnesses and surgery
5. Dental work – each child is encouraged to return a dental card on a yearly basis
6. Hospitalization
7. Allergies to medication, food, bee stings, etc.
